

SAFETY TALK

Visitor Safety and Awareness During an Active Construction Site Tour

Purpose:

Ensure all visitors understand the site conditions, potential hazards, and safety requirement before entering the designated tour areas.

1. Welcome and Safety Commitment:

- Before we begin our tour, we would like to take a few minutes to review some important safety precautions.
- While portions of the project have been completed, construction activities are still ongoing in designated areas. Our priority is to ensure everyone has a safe and enjoyable visit.

2. Key Safety Guidelines:

Safety Topic / Visitor Instructions

Designated pathways: Remain on the approved tour route and stay with your assigned group.

Personal protective equipment: Wear all required PPE as directed by the site safety team.

Uneven surfaces: Watch for changes in elevation, loose gravel, wet surfaces, and temporary walking surfaces.

Construction equipment: Stay clear of machinery, construction vehicles, and active work zones.

Restricted areas: Do not cross barriers, enter excavations, or approach exposed infrastructure.

Photography: Take photographs only in approved areas and follow NYCHA's photography and privacy guidance.

Resident access: Respect residents' privacy and keep building entrances and pedestrian routes clear.

Emergencies: Stop, follow the tour leader's instructions, and proceed to the designated assembly area.

3. Site Specific Hazards at Jefferson Houses:

Stormwater infrastructure: Do not approach open drainage structures, catch basins under construction, or exposed underground chambers.

Playground and recreational areas: Some areas may look complete but remain closed pending final inspections or corrective work.

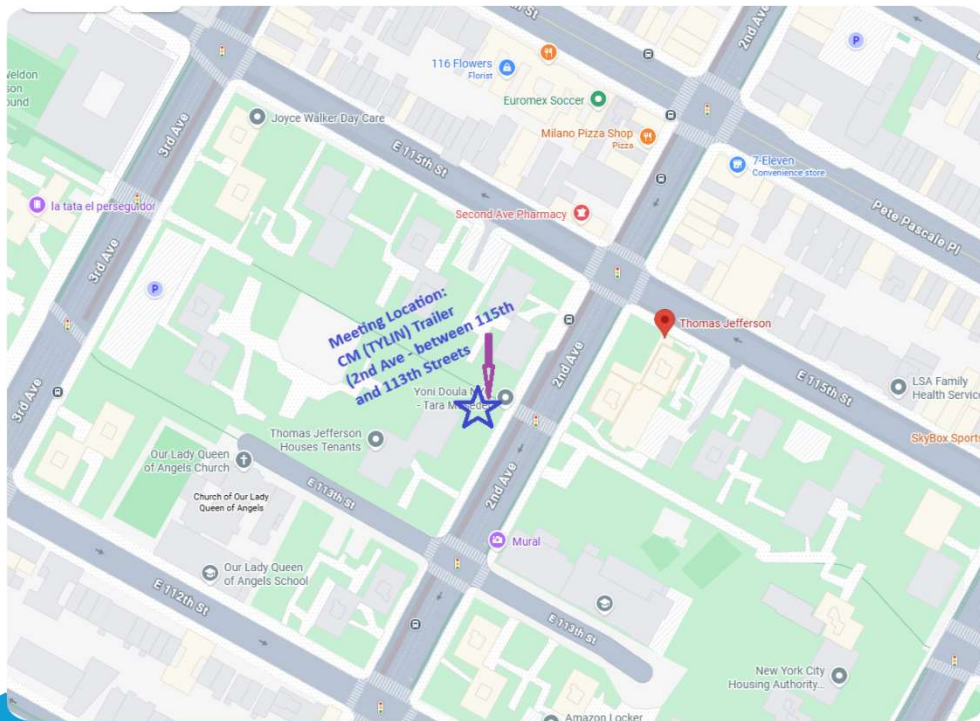

Ongoing construction: Be alert for workers, equipment, materials, and temporary construction barriers.

Pedestrian circulation: The development remains occupied. Visitors must avoid blocking resident access and remain within designated areas

4. Emergency Procedures:

Before the tour, identify the designated assembly location, the first-aid responder, and the emergency contact person.

Visitors should immediately notify a tour representative if they observe an unsafe condition, become separated from the group, or require assistance

5. Closing Safety Message:

- Safety is everyone's responsibility. We encourage you to ask questions and enjoy the opportunity to learn about the project, but please remain with your group and follow the instructions of our tour representatives.
- Our goal is for everyone to leave with a better understanding of the Jefferson Houses improvements—and to do so safely.

Thank you and enjoy the tour!!!
